

Vampir

Vampir is a commercial trace analysis and visualisation tool. It can work with traces in OTF and OTF2 formats. It does not have the functionality to collect traces, you need to use a trace collection tool (such as Score-P) first to collect the traces.

Installed versions

Version 8.5.0 is currently installed as module Vampir/8.5.0 :

```
$ module load Vampir/8.5.0  
$ vampir &
```

User manual

You can find the detailed user manual in PDF format in `$EBROOTVAMPIR/doc/vampir-manual.pdf`
